Subject: Spss syntax to generate table 4.3 Ghana DHS 2014
Posted by Michaelo on Mon, 20 May 2019 20:51:05 GMT

Dear DHS users
Kindly help me with spss syntax to help me create a table of age at first marriage by exact ages, especially for women aged 20-49. How do I replicate table 4.3 of the 2014 Ghana dhs report, Read the dhs user guide but still find it difficult to appreciate the process. Your kind help with a simplified spss syntax will be appreciated.
Thanks.
Michael
