Hi,

I have noticed that some of the zipped Stata files contain other zipped archives themselves. Usually the internal zip archives include the same name as the original file, and some other round. E.g.

File_number	filename	[ZipContents]
1022	SNBR70DT.ZIP	[SNBR6RDT.ZIP, SNBR70DT.ZIP]
1024	SNBR71DT.ZIP	[SNBR71DT.ZIP, SNBRG0DT.ZIP]
1030	SNCR70DT.ZIP	[SNCR6RDT.ZIP, SNCR70DT.ZIP]
1032	SNCR71DT.ZIP	[SNCR71DT.ZIP, SNCRG0DT.ZIP]
1043	SNHR70DT.ZIP	[SNHR6RDT.ZIP, SNHR70DT.ZIP]
1045	SNHR71DT.ZIP	[SNHR71DT.ZIP, SNHRG0DT.ZIP]
1059	SNIR70DT.ZIP	[SNIR6RDT.ZIP, SNIR70DT.ZIP]
1061	SNIR71DT.ZIP	[SNIR71DT.ZIP, SNIRG0DT.ZIP]
1071	SNKR70DT.ZIP	[SNKR6RDT.ZIP, SNKR70DT.ZIP]
1073	SNKR71DT.ZIP	[SNKR71DT.ZIP, SNKRG0DT.ZIP]
1080	SNMR70DT.ZIP	[SNMR6RDT.ZIP, SNMR70DT.ZIP]
1082	SNMR71DT.ZIP	[SNMR71DT.ZIP, SNMRG0DT.ZIP]
1091	SNPR70DT.ZIP	[SNPR6RDT.ZIP, SNPR70DT.ZIP]
1093	SNPR71DT.ZIP	[SNPR71DT.ZIP, SNPRG0DT.ZIP]

Are these internal archives different from the zipped versions of the other rounds themselves? I.e. is the subfile SNBR6RDT.ZIP included in SNBR70DT.ZIP the same or different from the version in the main file SNBR61DT.ZIP or SNBR6DDT.ZIP? Moreover, which version should one use and consider as the most up-to-date and correct?

Thanks!
