Dear user,

Please try to collapse using sum instead of count. That should work- but I didn't try it.

Any additional Stata questions I would recommend asking or searching for Stata posts; answering questions related to manipulating data using Stata or other programs is somewhat outside the scope of DHS staff role in the forum.

Q207 question series are not limited to women with a birth in the last 5 years, but you can tabulate that in the dataset to check. Please refer to the questionnaire posted at the end of the final report if you need more information on how the questions are phrased or to review any filters.

Thank you,
Lindsay
