Hi Again

I have tried to combine the stratum but i got another message that i should specify my data as nest=TRUE (Error in svydesign.default(id =  $\sim$ v021, strata =  $\sim$ v022, weights =  $\sim$ rweight, :Clusters not nested in strata at top level; you may want nest=TRUE.).

i have run the following conde : "dhsrw <- svydesign(id=~v021, strat=~v022, weight=~v005, data=rw2005pos, nest=TRUE) but unfortunately i'm getting another message that could not find function "svydesign".

Any one to help?
