Dear user,

Please be sure to use the KR file and not the IR file. The denominator is number of births to interviewed women. Missing cases are included in the denominator.

You can use the following code:

```
gen csec = 0
replace csec = 1 if m17==1

tab m17 csec [iw=v005/1000000],m
```

Please see these tips on matching tables: https://blog.dhsprogram.com/final-report-tables/
The Guide to Statistics: https://dhsprogram.com/pubs/pdf/DHSG1/Guide_to_DHS_Statistics_DHS-7.pdf
Or the GitHub for additional programs: https://github.com/DHSProgram/DHS-Indicators-Stata
