Dear user,

The denominator as listed in table 37 is 28,619; however, unlike standard DHS tabulations, this has excluded one case with missing information.

Please be aware of several publicly available resources we have, including tips on matching tables: <https://blog.dhsprogram.com/final-report-tables/> , The DHS Guide to Statistics: <https://dhsprogram.com/publications/publication-dhsg1-dhs-questionnaires-and-manuals.cfm> , and Stata programs for most chapters on GitHub: <https://github.com/DHSProgram/DHS-Indicators-Stata>

As you will find in the GitHub repository, to recreate the table using the IR file, please try the following code:

```
//ANC by type of provider
gen rh_anc_pv = 6 if m2a_1 != .
replace rh_anc_pv = 4 if m2f_1 == 1 | m2g_1 == 1 | m2h_1 == 1 | m2i_1 == 1 | m2j_1 == 1 |
m2k_1 == 1 | m2l_1 == 1 | m2m_1 == 1
replace rh_anc_pv = 3 if m2c_1 == 1 | m2d_1 == 1 | m2e_1 == 1
replace rh_anc_pv = 2 if m2b_1 == 1
replace rh_anc_pv = 1 if m2a_1 == 1
replace rh_anc_pv = 5 if m2a_1 == 9
```

```
label define rh_anc_pv ///
1 "Doctor" ///
2 "Nurse/midwife" ///
3 "Other health worker" ///
4 "TBA/other/relative" ///
5 "Missing" ///
6 "No ANC"
label val rh_anc_pv rh_anc_pv
label var rh_anc_pv "Person providing assistance during ANC"
```

```
tab rh_anc_pv [iw=sv005/1000000], m
```

```
//ANC by skilled provider
```

**** Note:** Please check the final report for this indicator to determine what provider is considered skilled.

```
recode rh_anc_pv (1/3 = 1 "Skilled provider") (4/6 = 0 "Unskilled/no one") , gen(rh_anc_pvskill)
label var rh_anc_pvskill "Skilled assistance during ANC"
```

```
tab rh_anc_pvskill [iw=sv005/1000000], m
```

Thank you,
Lindsay Mallick
