I'm currently working with the 2015-2016 household dataset, and would like to know if it's possible to get approximate locations of each household. It seems that clusters indicate districts, and if so, is the mapping the same as noted here:

<https://userforum.dhsprogram.com/index.php?t=msg&th=232&start=0>? Is it possible to get finer-grained locations than districts?
