
Subject: Questions on Discontinuation of contraception & the reasons for it

My question is regarding the questions about discontinuation of contraception and the reasons for this, as illustrated in fx. this DHS: <https://dhsprogram.com/pubs/pdf/FR321/FR321.pdf>

One of the reasons for discontinuation is 'side effects/health concerns' and I'm trying to understand why these two different things are pooled together into ONE code?

If I need to use the DHS on fx. Tanzania to investigate reasons for discontinuation, how can I differ between experienced side effects or concerns about it? Or, is it even possible to differ?
