Subject: Slums, Linking to Kenya Census?

Hi, I am trying to find out which Kenya DHS clusters are considered as in a slum. I know that the Kenya Census designates enumeration areas as slum and non-slums. Since the KDHS was sampled using the Kenyan Census, is there a way for me to link the two such that I can pull the information on whether or not the KDHS cluster is in an enumeration area designated as a slum?

Please let me know.
Thanks,
Vivian
