---

In the Nepal DHS 2016 Table 10.5, there is an ARI variable that must have been created from Q620 cough, Q621 rapid breathing and Q622 chest/nose. I want to use the ARI variable, but I can't find the created variable in the dataset. Can you tell me if it is somewhere in the dataset, or do I have to create it myself. If I have to create it, can you tell me how it was done, so that my variable and analysis is consistent with the DHSs. Many thanks.
