
Subject: Sharing code for child/infant/U5 mortality rates

Several users have already raised this but I could not find an answer: would DHS be willing to share the code that is used to calculate child/infant/U5 mortality rates as presented in the DHS reports?

I know there is this document http://dhsprogram.com/pubs/pdf/DHSG1/Guide_to_DHS_Statistics_29Oct2012_DHSG1.pdf, but would it be possible to get access to the code to reproduce the same rates?

Apologies in case I overlooked a message containing a response to this question already.

Many thanks.
