Dear Forum Users,

since my work is based on the Women's Questionnaire of the NFHS of 2015-2016.

Where can I find the the datas for women's abortions in the DHS Dataset ? The published Questionnaires of the NFHS shows that questions were asked about the how many abortion the women had, who conducted the abortion and where was it conducted. The general recode map of the DHS doesn't recode the variables for this specific case, nor could I find the fitting variables in the recode map.
Where can I find a fitting recode map for the NFHS survey ?
