Subject: reverse order of birth
Posted by mehri shams on Wed, 01 Apr 2020 08:28:46 GMT

Hello

Dear experts

I work with Afghanistan DHS 2015. Could you guide me know how I could use birth date data for calculation TFR.

In my data all birth of women starts with last born and ends with first born, So, I want the reverse order for the list of children (first born to last born).

Year of birth: b2_01 , b2_02 , ..., b2_20
