Dear User, Form P 428 in the final report Nigeria DHS 2018:

Quote:

The module on domestic violence was administered in the subsample of households that were selected for the men's survey. In accordance with the World Health Organization (WHO) guidelines on the ethical collection of information on domestic violence, only one eligible woman age 15-49 per household was randomly selected for the module, and the module was not implemented if privacy could not be obtained (WHO 2001). In total, 10,678 women completed the module. Only 1% of women eligible for the domestic violence module could not be successfully interviewed with the module because privacy could not be obtained or for other reasons. Special weights were used to adjust for the selection of only one woman per household and to ensure that the domestic violence subsample was nationally representative.
