Hello,

I am trying to find out effect of education on mensuration hygienic methods and I am using district fixed effect .

When I am using sample weights in fixed effect model ,
gen wgt =sample_weights/1000000
gen id = state*1000 +distt
xtset id
xtreg san_nap own_edu hsbnd_edu i.wealth_index i.cast_trib i.religion i.place_type i.grouped_age [pw=wgt] ,fe cluster(id)

I am getting error weight must be constant within id.

I do not understand why ??

Thanks
