Im also trying to reproduce Table 2.1 0 Birth registration of children under age 5 for Zimbabwe DHS 2015. My figures are not the same with those in the report. Below is my code

```
use "ZWPR72FL.DTA"
```

```
/*Set data for survey weighting*/  
gen wt=hv005/1000000
```

```
/*Generating weights*/  
svyset [pw=wt], psu(hv021) strata(hv025)
```

```
recode hv140 (0=0) (1/2=1) (else = .) if hv102==1, gen(birthreg)  
label var birthreg " birth registered "  
ta birthreg
```
