Im also trying to reproduce Table 2.1 0 Birth registration of children under age 5 for Zimbabwe DHS 2015. My figures are not the same with those in the report. Below is my code

use "ZWPR72FL.DTA"

/\*Set data for survey weighting\*/ gen wt=hv005/1000000

/\*Generating weights\*/ svyset [pw=wt], psu(hv021) strata(hv025)

recode hv140 (0=0) (1/2=1) (else = .) if hv102==1, gen(birthreg) label var birthreg " birth registered " ta birthreg
