Subject: Linking malnourished children to mothers Posted by smd80 on Mon, 15 Jun 2020 16:32:55 GMT View Forum Message <> Reply to Message

Dear all,

I am examaning child stunting, wasting and underweight as outcome variables and need to match mothers with children in the Uganda DHS 2016. Is it possible to do this using only the IR file?

Many thanks for your help,

JSD
