Subject: Sample size NDHS 2018
Posted by edifofon on Sun, 05 Jul 2020 20:48:27 GMT

My question refers to Table 11.9 of NDHS 2018.

The number of children age 6-59 months does NOT give 11,391 when using the command below.
I used the PR file.

g wgt=hv005/1000000
svyset [pw=wgt], psu(hv021) strata(hv023)
svy: ta sb113b if hv103==1

What am I not getting?

Thanks
