Hello,

From the 2014-15 TSPA Final Report, it is mentioned that 723 out of 1200 health facilities offer CRD services. After looking through the Facility Recode file titled TZFC71DTSR.ZIP on STATA, I have been unable to find any variables listing 723 facilities.

For example, when exploring variable V1605a, labelled 'diagnose and/or manage chronic respiratory diseases', only 611 facilities can diagnose and treat, and 247 facilities are missing.

Is there a variable that lists all 723 facilities offering CRD services? I would greatly appreciate any help on this matter.

Many thanks
