Dear forum

My name is Gideon chunga a student at the university of Zambia. I'm doing a research under the topic of feeding practices and diarrhea in children aged 6 to 23 months.

This analysis involves the use of ZDHS 2018 children file (ZMKR71FI), stata software.

I'm kindly in need of help on how to come up with variables and tabulations on this topic.

Your help will be greatly appreciated.
