Hello,  
Computing child mortality indicators can be tricky. You should check the Stata do files available on github.  
[https://github.com/DHSProgram/DHS-Indicators-Stata/blob/master/Chap08\\_CM/CM\\_CHILD.do](https://github.com/DHSProgram/DHS-Indicators-Stata/blob/master/Chap08_CM/CM_CHILD.do)  
Best,  
Bruno
