Thanks for the information. I only added 2 additional covariates to the code. Like "State Category" and Age group in years.

```
replace covariatelabel="Age group in years" if regexm(covariate,"v013")==1
```

```
replace covariatelabel="State Category" if regexm(covariate,"StateCategory")==1
```

I am also attaching the overall code and the modification I did. Thank you for your help
