Subject: Re: Adolescent Fertility Rate(FE_FERT.do File)-Nigeria
Posted by placidplus on Tue, 25 Aug 2020 14:41:57 GMT

Thanks for the information. I only added 2 additional covariates to the code. Like "State Category" and Age group in years.
replace covariatelabel="Age group in years" if regexm(covariate,"v013")==1
replace covariatelabel="State Category" if regexm(covariate,"StateCategory")==1

I am also attaching the overall code and the modification I did. Thank you for your help
