Hello Samia,

If you are trying to match Table 9.10 of the BDHS 2014 Final report you need to perform several checks to match the Table. For instance, you would need to see the type of provider giving the postnatal check.

Please study the code below that will give you a match with the table.

Thank you.

Best,  
Shireen Assaf  
The DHS Program

\*child's age, this is used to select for births in the last 3 years  
gen age = v008 - b3\_01

//PNC timing for mother  
\*did the mother have any check  
gen momcheck = 0 if age<36  
replace momcheck = 1 if (m62\_1==1 | m66\_1==1) & age<36

\*PNC timing for mother  
recode m51\_1 (100/103 = 1 "<4hr") (104/123 200 = 2 "4-23hrs") (124/171 201/202 = 3 "1-2 days")  
///  
(172/197 203/206 = 4 "3-6 days") (207/241 301/305=5 "7-41 days") ///  
(198/199 298/299 398/399 998/999 = 9 "dont know/missing") (242/297 306/397 = 0 "no pnc  
check") (else=0) if (age<36 & momcheck==1) , g(rh\_pnc\_wm\_timing)  
replace rh\_pnc\_wm\_timing = 0 if m50\_1==0 | m50\_1==9  
\*recode as no PNC if not performed by a trained provider  
replace rh\_pnc\_wm\_timing = 0 if (m52\_1>15 & m52\_1<97) | m52\_1==.  
replace rh\_pnc\_wm\_timing=. if age>=36 | bidx\_01!=1  
label var rh\_pnc\_wm\_timing "Timing after delivery for mother's PNC check"

gen wt=v005/1000000

tab rh\_pnc\_wm\_timing [iw=v005/1000000]
