I am using BDHS 2007 data and looking at variables of Postnatal care for mothers and trying to match the table 9.8.2 of 2007 report. However 'who checked on your health' is not coded as m52\_1 like other rounds (2011, 2014). I have found s434a\_1 instead that gives information only for health checked by a qualified doctor. I want to create a variable of care provider as 'medically trained provider' and 'other providers'. but 2007 data contain a variable for each provider (s434a\_1 to s434x\_1) that made me confused on how to recode these variables as one variable.

I am also struggling in getting the value of 16% PNC coverage by a medically trained provider within 2 days of birth for the 2004 dataset (as mentioned in the 2014 report)

Can you please help me? I would highly appreciate your help or suggestion in this regard. hope to hear from you soon.
