Subject: Imputing missing DOBs for children

Hello -

I am working with a dataset that is adapted from DHS. However, the data providers have not done as thorough of a job of imputing dates of birth for children as the DHS Program. I have reviewed the methodology for the DHS DOB imputation. Does DHS share the code for imputing missing DOBs for children? I understand the process but was curious about the STATA code to actually impute dates.

I would appreciate any feedback on the most efficient way to do this, given that there are 4 panels in my data.

Thank you
