Hello,

For vaccination please refer to our code share library in Chapter 10. Specifically the indicators you are interested in are found in CH_VAC.do file. The variable you are looking for in this do file is ch_allvac_either. Please read the readme file and the main file for the chapter before running any code. The link is: https://github.com/DHSProgram/DHS-Indicators-Stata
Please go to Chap10_CH folder on this site.

Please also refer to the Guide to DHS Statistics for further details on how vaccination indicators are computed.

Thank you.
Best,
Shireen Assaf
The DHS Program
