Hi again,

I included "if b5 == 1 & oneyr ==1" in the code for basic vaccinations below and I got 25.6% for 5900 children in 2013, while the official 2013 NDHS report has 25.3%

```
gen ch_allvac_either=ch_bcg_either==1&ch_dpt3_either==1&  
ch_polio3_either==1&ch_meas_either==1 if b5 == 1 & oneyr ==1  
label var ch_allvac_either "All basic vaccinations according to either source"  
tab ch_allvac_either [iw=wt]
```

I think this works better than dropping all other children from the dataset

Thanks again.
