Hi again,

I included "if b5 == 1 & oneyr ==1" in the code for basic vaccinations below and I got 25.6% for 5900 children in 2013, while the official 2013 NDHS report has 25.3%

gen ch\_allvac\_either=ch\_bcg\_either==1&ch\_dpt3\_either==1& ch\_polio3\_either==1&ch\_meas\_either==1 if b5 == 1 & oneyr ==1 label var ch\_allvac\_either "All basic vaccinations according to either source" tab ch\_allvac\_either [iw=wt]

I think this works better than dropping all other children from the dataset

Thanks again.
