Hello DHS Forum,

Thanks for making the scripts for the Chapter 16 Stata Scripts available. I am working on estimating MMR & PRMRatio for Nigeria and specific regions of the country. After executing the "AM_gfr.do", The "AM_rates.do" ran into issues for me at the point of running the "main_adult_mm_mortality" program. Please find attached a snapshot of the error and the overall copy of the executed script. Please I will need help to fix this to enable make progress with my analysis. Thank you very much.

Kind Regards,
Placid Ugoagwu.
