Following is a response from DHS Research & Data Analysis Director, Tom Pullum:

That survey would be one of the last ones that did not include b19. The KR file includes the child's age in completed months as hw1. This is calculated as  $hw1 = v008 - b3$ . For age 6-23 months you would include the child "if  $hw1 \geq 6$  &  $hw1 \leq 23$ ".
