Dear DHS Team,

I am using India NFHS-4 KR data(Stata) to calculate "knowledge of ORS packets" using variable v416 but the total no of women is not matching with the National report- table no 9.15.

Also, want to see the "Stool disposal practice(in case of the youngest child only" using the same KR data with ta v465[iw=wt] if b9==0, but it is not matching with the report table 9.16.

Can you please help in this regards?SHAREit Appvn
