Dear Sir,

I am trying to use SAS dataset in SAS 9.3 here my problem is in individual file birth history the same variable repeat 15 times because of 15 members in the household. but i need to arrange data like one by one household. please can you suggest me how to go about it?

data looks like

```
case_ID  age1  birth_date1  sex1  twin_child1  age2  birth_date2  sex2  twin_child2
```

but i need to arrange data like this

```
case_ID  age  birth_date  sex  twin_child
```

1

2

3

please help me in this as per as possible. my email ID- anilgvdbm@gmail.com

Thanks in Advance...

Anil
