Dear User,

According to our standard recode manual:

V106 Highest education level attended. This is a standardized variable providing level of education in the following categories: No education, Primary, Secondary, and Higher. In some countries the educational system does not fit naturally within this scheme and a different categorization was used for the Final Report. In this case, this variable is constructed as accurately as possible from the country's own scheme and the variable used for the Final Report is included as a country-specific variable.

V107 Highest year of education gives the years of education completed at the level given in V106.

BASE: All respondents except those answering "No education" or with missing data for V106 (V106 <> 0 & V106 <> 9).

Hope this helps to answer your question.
