Subject: interviewer identifier Posted by Guilhem on Sun, 18 May 2014 05:28:27 GMT

Hello,

in a regression analysis, I'd like to control for the identity of the interviewer.

The DHS2 survey, which I am using has a code for interviewer (hv018) which varies from 0 to 99.

This does not seem to uniquely identify the interviewer.

Could you tell me with which other variable I should combine hv018 in order to get to a unique interviewer ID?

Many thanks,

Guilhem
