Hello,

Working with the 2017 data, I am able to match the final report with the Stata code found below. I think perhaps you have forgotten to weight the data. You need to apply weights to match the final report tables.

Thank you.

Best,
Shireen Assaf
The DHS Program

Stata code:

```
gen consang=s711b  
replace consang=0 if s711a==0  
label values consang S711B
```

```
gen wt=v005/1000000
```

```
ta s711a [iw=wt]  
ta consang [iw=wt]
```

```
*by region  
ta v024 s711a [iw=wt], row
```

```
*get get ibn al amm, see category #3  
ta v024 consang [iw=wt], row
```
