Subject: Staff trained for ANC Posted by bakerchowdhury on Tue, 05 Jan 2021 15:46:13 GMT View Forum Message <> Reply to Message

"I would like to create the variable "Staff trained for ANC" using Nepal Health Facility Survey-2015 (Report-Table 6.2 page 120). First I merged the provider data with facility inventory data. Then I tried using the following code but the result was not similar to the report:

gen trained\_staff=0 replicate trained\_staff=1 if P502\_1 ==1 | P502\$2==1 | P502\$3==1 | P502\$4==1 | (P505\$1==1 | P505\$5==1)
