I am having problem replicating the number of households reported in table 2.18 (Food security adults, number of household=11,016) and table 2.19 (Food security children, number of household=5923) in the 2016 South Africa Demographic Health Survey report.

The number of households i got those not tally with the table.

I would be glad if someone could assist me with the codes.

Thank you very much.
