---

I am using the 2012 and 2017 Jordan DHS and need to identify enumeration areas that are in camps for Syrian refugees.

In the 2012 DHS there is a variable to indicate camps, e.g., the variable "scamps" in the BR file. From the documentation I understand that the 2017 DHS had two strata that were specific to camps. But these strata do not seem to be identified in v023 or elsewhere, and there is no "scamp" variable. I am also unsure if those are the only enumeration areas in camps or if there might be others outside of these two strata.

Could you kindly provide guidance on how to identify EAs that are in refugee camps, in the 2017 Jordan DHS?

Many thanks.
