Thank you very much, this is all extremely helpful.

V022 is correct for the 2017 Jordan DHS.

For the 2012 Jordan DHS V022 has 42 strata but the final report says it should have 43? Could this possibly be a typo?

For the 2007 I need to construct the variable for stratum - would a cross between V024 and V025 be the best thing to do?

Thanks
Olympia
