Dear Tom,

I also want to calculate perinatal mortality in the Philippines using (PH DHS 2017). However, when I input the state it shows: variable vcal_1 not found. Is there any possibility of missing vcal_1 variables, but I found in the final report (PH DHS 2017) it is there (perinatal mortality rate /result calculation). Should I use different data sets other than BR/IR files?

Thanks,
Sam
