Hi Tom and Bridgette,

First - please ignore the question about code below. I used the PR file, and it worked. The second question still remains. We would like to know whether it is possible to restrict the sample to women who answered both the household survey (e.g. reported their own use of harsh child discipline against the selected child) and the domestic violence module questions. I do not see line items for the domestic violence module, so am not sure this is possible?

Thanks,
Stephanie
