The variable you are looking for (question 716) is a country specific question. For country specific questions, the variables are generally named and coded in the same way as they were on the questionnaire. The variable will have a leading "SH" if the question was asked at the household level, a leading "S" if asked at the women's level, and a leading "SM" if asked at the men's level.

Please look in the men's questionnaire for Question 716. In the Men's Recode and Couples Recode datasets, look for SM716. The questionnaires can be found here.
