Dear DHS team,

I have two questions: Would this svyset be correct for running models using variables related to intimate partner violence? I'm using the 2005, 2010 and 2015 surveys.

```
svyset v021 [pw=d005], strata(v023)
```

Second, I can't find variables for IPV in the last 12 months for any of the Colombian Survey. Could please indicate to where to find them (if there are any)? Thanks in advance.

Best regards.

Deidi
