Dear,

I do not find the variable:

v171b Frequency of using internet last month (women)

mv171b: Frequency of using internet last month (men)

that I intend to merge with the couple's recode, in any of the datafiles. However, it is asked for both men and women in the survey (DHS-VII) in India (question 121 for women).

Is there anyone who could check this for me? I've searched everywhere.

Secondly, how would you recommend to merge the couple's recode and the household's recode?

Kind regards

Zoë
