Dear DHS Experts, I want to conduct a research on Predictors of Neonatal mortality from 2019 Ethiopia Mini DHS. Which dataset is better for Neonatal mortality data? Which commands give us the same result with figure 6.1 and table 6.1 of 2019 EMDHS? I kindly request you guidelines necessary for multilevel modeling for DHS data? Can I conduct Multilevel Model for Neonatal mortality for this data?

With Kind Regards, Hassen
