The SN70 files include just the 2014 round. The SN6R files include the combined 2012-13 and 2014 rounds. You should use SN6R for estimates for subnational regions. Men were included in the 2014 round but not the 2012-13 round. The SN71 files include just the 2016 round. SNG0 includes the combined 2015 and 2016 rounds.
