Thank you, Bridgette.

I have three more questions:

- 1) I saw some survey years of DHS data are 2015-2016, and some are 2015, what's the difference? 2015-2016 means two-year data set while 2015 means only a one-year dataset?
- 2) you said "SNG0 includes the combined 2015 and 2016 rounds while SN71 files include just the 2016 round", but there is a file for the year 2015, which is SN7H, so SNG0=SN71+SN7H, right?
- 3) "Men were included in the 2014 round but not the 2012-13 round"- this refers to the MR file, right?

Thanks:)
