Following is a response from DHS Research & Data Analysis Director, Tom Pullum:

Here's how I would match table 10.8, which says that 14.5% of women received care from a trained provider within two days after the most recent live birth in the past 5 years.

use ...BDIR4JFL.DTA, clear

label list m15\_1

label list m51\_1

label list m52\_1

gen within\_2days=0 if midx\_1==1

replace within\_2days=1 if (m15\_1>=20 & m15\_1<96)

replace within\_2days=1 if (m52\_1<20 & m51\_1<=101)

tab within\_2days [iweight=v005/1000000]

If you restrict to most recent births in the past 3 years (v008-b3\_01<36), you will get 16%. That is, the code for 3 years would be this:

use ...BDIR4JFL.DTA, clear

gen within\_2days=0 if midx\_1==1

replace within\_2days=1 if (m15\_1>=20 & m15\_1<96)

replace within\_2days=1 if (m52\_1<20 & m51\_1<=101)

replace within\_2days=. if (v008-b3\_01>=36)

tab within\_2days [iweight=v005/1000000]
